1. Carreres et al. 2025. *Type Ia Supernova Growth-rate Measurement with LSST Simulations: Intrinsic Scatter Systematics*

Published in The Astrophysical Journal. doi: [10.3847/1538-4357/ae11ac](https://doi.org/10.3847/1538-4357/ae11ac)

In this paper, I study the impact of intrinsic scatter of SNe Ia on the measurement of $f\sigma_8$. This study is done through the simulation of the full low-z LSST SNe Ia sample for different intrinsic scatter models. We found that the most realistic model of intrinsic scatter causes non-Gaussianities in the Hubble diagram residuals, resulting in a bias on $f\sigma_8$.

2. Carreres et al. 2025. *ZTF SN Ia DR2: Peculiar velocities' impact on the Hubble diagram*

Published in Astronomy & Astrophysics. doi: [10.1051/0004-6361/202450389](https://doi.org/10.1051/0004-6361/202450389)

This paper is part of the second data release of ZTF SNe Ia. In this paper, I study the impact of the peculiar velocity (PV) systematics on the Hubble diagram of the ZTF SN Ia DR2 sample. We show that not taking into account the full PV covariance matrix can lead to a slight underestimation of the error on the Hubble constant H_0 and could shift its value by $\sim 1 \text{ km s}^{-1}$.

3. Carreres et al. 2023. *Growth-rate measurement with type-Ia supernovae using ZTF survey simulations*

Published in Astronomy & Astrophysics. doi: [10.1051/0004-6361/202346173](https://doi.org/10.1051/0004-6361/202346173)

This paper is the main publication of my thesis. In this paper, I present my work to prepare for the future measurement of the growth rate of structure ($f\sigma_8$) from ZTF SN Ia data. I describe my realistic simulation of the ZTF SN Ia sample and, using these simulations, I study the biases and systematics that can affect the measurement of $f\sigma_8$. I show that using SN Ia data from the full 6 years of the ZTF II sample with a cut at a redshift of $z < 0.06$ to avoid selection due to magnitude limit, we can expect an unbiased measurement of $f\sigma_8$ with an error of $\sim 19\%$.

Publications with significant contribution

1. Acevedo, Scolnic, Carreres et al. 2025. *The Weighing Halos Accurately, Locally, and Efficiently with Supernovae (WHALES) Survey Overview and Initial Data Release*

Pre-published on arXiv. doi: [10.48550/arXiv.2510.26731](https://arxiv.org/abs/2510.26731)

This paper introduces the WHALES survey that is discovering SNe Ia nearby the Shapley Supercluster. I contributed to simulations and forecasts described in this paper.

2. Acevedo, Sherman, Brout, Carreres et al. 2025. *The Dark Energy Bedrock All-sky Supernova Program: Cross Calibration, Simulations, and Cosmology Forecasts*

Published in The Astrophysical Journal. doi: [10.3847/1538-4357/ae1e78](https://doi.org/10.3847/1538-4357/ae1e78)

This publication introduces the Dark Energy Bedrock All-Sky Supernova (DEBASS) low- z survey. The paper gives an overview of the survey, examines systematic effects such as photometric calibration and selection effects, presents simulations, and provides forecasts for future cosmological analysis. I wrote and ran the forecast codes, and I was actively involved in the simulations and writing process

3. Rosselli, Carreres et al. 2025. *Forecast for growth-rate measurement using peculiar velocities from LSST supernovae*

Published in Astronomy & Astrophysics. doi: [10.1051/0004-6361/202556181](https://doi.org/10.1051/0004-6361/202556181)

This paper presents a simulation-based forecast for the measurement of the growth rate of structure ($f\sigma_8$) with the Rubin-Lsst survey. It shows that the full constraining power of the Rubin-Lsst SNe Ia sample will enable a constraint at the $\sim 10\%$ level in the redshift range $0.02 < z < 0.14$. I participated in the development of the simulation and analysis code used in this publication. I was also involved in the writing and review process.

4. Ravoux, Carreres et al. 2025. *Generalized framework for likelihood-based field-level inference of growth rate from velocity and density fields*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202554319
 This paper presents the FLIP Python library. This library is based on codes developed during my PhD and proposes a more general framework for the constraint of the growth rate of structure. I actively participated in the development of FLIP and in the writing of this paper.
5. Peterson, Carreres et al. 2025. *Improving the Determination of Supernova Cosmological Redshifts by Using Galaxy Groups*
 Published in *The Astrophysical Journal*. doi: 10.3847/1538-4357/ada285
 In this paper, we used SNe Ia data and the Uchuu UniverseMachine simulation to study the improvement on the SNe Ia Hubble diagram that we can expect from averaging redshift over galaxy groups of SN Ia hosts. I ran the simulations and was actively involved in the analysis.

Publications as co-author

1. Lacroix, Regnault, Jaeger, Jeune, Betoule, Colley, Bernard, Rigault, Smith, Goobar, Maguire, Dimitriadis, Nordin, Johansson, Aubert, Barjou, Bellm, Bongard, Burgaz, Carreres et al. 2025. *ZTF SNe Ia DR2: Towards cosmology-grade ZTF supernova light curves using scene modeling photometry*
 Pre-published on arXiv. doi: 10.48550/arXiv.2509.04073
 ZTF SN Ia cosmology group collaboration paper.
2. Ginolin, Rigault, Smith, Copin, Ruppin, Dimitriadis, Goobar, Johansson, Maguire, Nordin, Amenouche, Aubert, Barjou-Delayre, Betoule, Burgaz, Carreres et al. 2025. *ZTF SN Ia DR2: Environmental dependencies of stretch and luminosity for a volume-limited sample of 1000 type Ia supernovae*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450378
 ZTF SN Ia cosmology group collaboration paper.
3. Amenouche, Rosnet, Smith, Rigault, Aubert, Barjou-Delayre, Burgaz, Carreres et al. 2025. *ZTF SN Ia DR2: Simulations and volume-limited sample*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202452134
 ZTF SN Ia cosmology group collaboration paper.
4. Rigault, Smith, Regnault, Kenworthy, Maguire, Goobar, Dimitriadis, Johansson, Amenouche, Aubert, Barjou-Delayre, Bellm, Burgaz, Carreres et al. 2025. *ZTF SN Ia DR2: Study of Type Ia supernova light-curve fits*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450377
 ZTF SN Ia cosmology group collaboration paper.
5. Aubert, Rosnet, Popovic, Ruppin, Smith, Rigault, Dimitriadis, Goobar, Johansson, Barjou-Delayre, Burgaz, Carreres et al. 2025. *ZTF SN Ia DR2: Exploring SN Ia properties in the vicinity of under-dense environments*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450951
 ZTF SN Ia cosmology group collaboration paper.
6. Rigault, Smith, Goobar, Maguire, Dimitriadis, Johansson, Nordin, Burgaz, Dhawan, Sollerman, Regnault, Kowalski, Nugent, Andreoni, Amenouche, Aubert, Barjou-Delayre, Bautista, Bellm, Betoule, Bloom, Carreres et al. 2025. *ZTF SN Ia DR2: Overview*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450388
 ZTF SN Ia cosmology group collaboration paper.
7. Popovic, Rigault, Smith, Ginolin, Goobar, Kenworthy, Ganot, Ruppin, Dimitriadis, Johansson, Amenouche, Aubert, Barjou-Delayre, Burgaz, Carreres et al. 2025. *ZTF SN Ia DR2: Evidence of changing dust distribution with redshift using type Ia supernovae*
 Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450391
 ZTF SN Ia cosmology group collaboration paper.

8. Ruppin, Rigault, Ginolin, Dimitriadis, Goobar, Johansson, Maguire, Nordin, Smith, Aubert, Biedermann, Copin, Burgaz, **Carreres** et al. 2025. *ZTF SN Ia DR2: Impact of the galaxy cluster environment on the stretch distribution of Type Ia supernovae*
Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450956
ZTF SN Ia cosmology group collaboration paper.
9. Ginolin, Rigault, Copin, Popovic, Dimitriadis, Goobar, Johansson, Maguire, Nordin, Smith, Aubert, Barjou-Delayre, Burgaz, **Carreres** et al. 2025. *ZTF SN Ia DR2: Colour standardisation of type Ia supernovae and its dependence on the environment*
Published in *Astronomy & Astrophysics*. doi: 10.1051/0004-6361/202450943
ZTF SN Ia cosmology group collaboration paper.
10. Scolnic, Riess, Murakami, Peterson, Brout, Acevedo, **Carreres** et al. 2025. *The Hubble Tension in Our Own Backyard: DESI and the Nearness of the Coma Cluster*
Published in *The Astrophysical Journal Letters*. doi: 10.3847/2041-8213/ada0bd
I contributed to this paper by running a check on an N-body simulation to determine the typical size of a Coma-like cluster.

Talks

1. Jan. 2026 - **SNe Ia growth-rate measurements with Rubin-LSST simulations: intrinsic scatter systematics** at *CPPM Renoir science meeting*, Marseille, France
2. Nov. 2025 – **DESC Project announcement: Constraining Structure Growth and Modified Gravity Using LSST low-z SN Ia PVs and Weak Lensing** at *DESC-MCP meeting*, online
3. Sept. 2025 – **Status of PV cosmology in LSST-DESC** at *DESC workshop on cosmology with peculiar velocities*, Marseille, France
4. Jul. 2025 - **SNe Ia growth-rate measurements with Rubin-LSST simulations: intrinsic scatter systematics** at *Cosmic Lighthouses 2025*, Cambridge, UK
5. Feb. 2025 – **Improving SN Ia Hubble residual scatter with galaxy groups** at *CosmicFlows 2025*, Brisbane, Australia
6. Mar. 2025 – **SNe Ia growth-rate measurements with Rubin-LSST simulations : intrinsic scatter systematics** at *SN Ia cosmology group of LPCA*, online
7. Feb. 2025 – **SNe Ia growth-rate measurements with Rubin-LSST simulations : intrinsic scatter systematics** at *CosmicFlows 2025*, Brisbane, Australia
8. Oct. 2024 – **DESC Project announcement: Measurement of the growth-rate of structures using SN Ia PVs in the BBC framework** at *DESC-TD biweekly meeting*, online
9. Sept. 2023 – **Possible velocity systematic on the Hubble diagram fit** at *ZTF France*, LPC, Clermont-Ferrand, France
10. Aug. 2023 – **$f\sigma_8$ measurement with type Ia supernovae** at *DESC-TD biweekly meeting*, online
11. May 2023 – **Growth-rate measurement with type Ia supernovae** at the *Duke cosmology group' seminar*
12. Nov. 2022 – **Cosmology with the growth rate using type Ia supernovae** at *Action Dark Energy 2022*, Marseille, France

13. May 2022 – **Measuring $f\sigma_8$ with the ZTF SN Ia sample** at *Rubin-LSST France 2022*, LAPP, Annecy, France
14. May 2022 – **Measuring $f\sigma_8$ with the ZTF SN Ia sample** at *ZTF spring meeting*, LPNHE, Paris, France
15. June 2021 – **Peculiar velocities with Type Ia Supernovae** at *Rubin-LSST France 2021*, LPSC, Grenoble, France

Posters

1. 2022 - **Cosmology with the growth rate of structures using type Ia supernovae** at *DESC Summer Meeting 2022*, University of Chicago
2. 2022 - **Cosmology with the growth rate of structures using type Ia supernovae + Proceedings** at *Rencontres de Moriond*
